Critical Service Issue Recall Notice

SUBJECT: Recall Notice: Throttle Cable Replacement

MODELS: All Utility Vehicles

TO BE CARRIED OUT: Inspect and Repair Throttle Cable p/n 50038315

This notice is to advise you that a potential problem has been identified with throttle cables on all Bush Hog Model 440, Model 4200 and 4400 Utility Vehicles which could result in a frozen throttle or difficult to operate throttle during cold weather.

This is a potential safety issue because the engine may not return to idle when you take your foot off the accelerator pedal. To prevent the possibility of this situation occurring and causing injury or damage it is imperative that operation of your unit cease immediately if you are operating your unit in cold weather (below freezing) and the unit be returned to your local Bush Hog dealer for inspection and repair. If the unit is not being operated in cold weather, it is still critical that the unit be brought into your local Bush Hog dealer for the repair as soon as possible. Please contact your local Bush Hog dealer to schedule a service appointment.

We apologize for any inconvenience that this problem may cause, but are dedicated to resolving issues in a pro-active manner. If you have any questions, please contact our service Department at any of the toll free numbers:

(877) 873-0143
(877) 873-0144
